## Player Whitelist Info

(6/27/16)

### Cloudstream Player & Cloudstream Services

If your player is located behind a firewall and you are having problems connecting to the Cloudstream Music stations or the Cloudstream Device, here is a list of Domain Names, IP address and ports to whitelist on your firewall settings.

#### Player configuration and updates:

**Port 80 & 443** -- This provides connection used by the CMS for management of the devices, productions and pushing commands and files (messages, music) to the device.

#### Whitelist the following URLs

<https://cloudstream.media>

<http://cloudstream.media>

<https://cloudstream.com>

<http://cloudstream.com>

<https://app2.cloudstream.com>

<https://app.cloudstream.com>

<https://nam.cloudstream.media>

<https://cdms.cenique.com/cdms/>

<http://cdms.cenique.com/cdms/>

<https://cloudstream-production.s3.amazonaws.com>

#### Whitelist the following IP Addresses (used for media proxy)

**Note:** typically we encourage use of Domain Names to allow flexibility for us to scale our cloud based services as needed. IP addresses will work better for our purposes here.

#### Domain Names

[radioio.iad.streamguys1.com](http://radioio.iad.streamguys1.com)

[radioio.ord.streamguys1.com](http://radioio.ord.streamguys1.com)

#### IP Addresses

216.246.37.228

204.93.212.109
