Lower Your Business Telephone Bill with Skype on your PBX/Phone System!!

Actiontec VoSKY Exchange Skype Gateways connect your PBX Phones to SKYPE!!

Make unlimited calls for only \$1.97/mo per line on your CURRENT business PBX/Phone system!!

Your Ultimate Gateway to Skype...

## **Lower your Phone Bill to \$1.97/mo for unlimited calls to U.S & Canada**

### **with Skype on your PBX/Phone System with Actiontec VoSKY Exchange Skype Gateways!!**

**GO TO [www.SkypeMyPBX.Com](http://www.SkypeMyPBX.Com)**

### **Have you heard about Skype?**

### **Skype:**

Skype is the world's largest free VoIP network with over 270 million registered users in its global community. It is a fast growing division of Internet auction giant eBay. According to Skype, over 162 billion minutes or 7% of the world's international long distance minutes traverse the company's VoIP network. Unlike other VoIP networks which are based on the session initiation protocol (SIP), Skype is a proprietary peer-to-peer VoIP network that offers the following advantages:

- Superior, high fidelity, audio quality
- Seamless NAT/Firewall traversal
- End-to-end security with AES (Advanced Encryption Standard)
- Better scalability

### **Skype for Business:**

Skype estimates that their nearly 30% of their subscriber base are already using Skype to conduct business. A survey conducted by Wainhouse Research suggested that 70% of the respondents stated that Skype's quality is acceptable for business use. According to Skype, most companies using Skype define themselves as: Consultancy, Software & Services, Business service, Financial services, Education, Technology and hardware equipment. Among these businesses, 75% have less than 50 employees, 63% conduct business abroad, and over 25% have more than 3 office locations.

### **Key Drivers for Skype Adoption by Businesses:**

- Cost savings on long distance and international calls
- Keeping in touch while on the road for business
- Enhanced collaboration with co-workers and partners

### **How Much Does it Cost?:**

With Skype you can make unlimited calls to landlines and cell phones in the US and Canada. When you pay for a year at a time it is only \$23.60/yr - That's only \$1.97/mo!!!

To good to be true and that only applies when you make calls on your computer?  
Now there is way to incorporate Skype into your PBX with Actiontec VoSKY Exchange Skype Gateways!!

## **Actiontec VoSKY Exchange Skype Gateways** **World's 1st Skype Certified PBX Gateway for Business:**

### **Skype Certified & Supports Full Skype Experience!:**

Actiontec VoSKY Exchange Skype Gateways are the world's 1<sup>st</sup> Skype certified PBX Gateway for Business meaning they have passed the rigorous Skype certification process and met Skype's technical requirements for quality of service and usability. They are also the only gateways reliable enough to win Skype's seal of approval as a Skype co-branded gateway! Actiontec VoSKY Exchange Skype Gateways are also the only gateways to be certified and endorsed by key PBX vendors, including AltiGen, Avaya, ShoreTel, and 3Com. Actiontec VoSKY Exchange Skype Gateways support Skype's dialing and speed dialing formats, as well as other Skype features such as SkypeOut™ and SkypeWeb. And, if you should run into trouble, integrated Skype Status Detection and Crash Detection automatically come to the rescue.

Actiontec VoSKY Exchange Skype Gateways make it easy and cost-effective for SMBs (Small to Medium Business) to connect to Skype. With the Actiontec VoSKY Exchange Skype Gateways, SMBs no longer have to forklift their current phone systems to take advantage of the benefits of VoIP. The Actiontec VoSKY Exchange Skype Gateways seamlessly integrate with existing PBX or KTS phone systems to allow SMBs to utilize their existing office phones to access the global Skype VoIP network for efficient and effective communication and collaboration with employees, customers and partners.

### **Easy to Use! Simply Pick up the Phone & Dial... No End User Training Required:**

After installation, anyone in the office can access a Skype line. Just pick up the phone and press a preset number (8, for example), and VoSKY Exchange finds an open line. And, since Actiontec VoSKY Exchange Skype Gateways routes Skype calls through the office PBX, calls are now made and received through existing office phones.

#### **4 Simple Ways to Reduce Your Communication Costs:**

1. Reduce the number of Telco POTS lines you have by replacing them with Exchange/Skype lines.
2. Create a Voice Intranet with Exchange/Skype for FREE intraoffice calls between locations.
3. Encourage partners & suppliers to use Skype for FREE calls to and from your company.
4. Reduce 1-800 costs with Web-based Click-to-Dial using Exchange/Skype.

### **Other Key Advantages:**

- Simplify the management of Skype on one server to give MIS better control
- Secured VoIP communication with end-to-end Skype encryption
- Achieve fast ROI with cost-effective VoSKY Exchange and Skype
- Automatic firmware checks for new revisions every 24 hours
- Rack mountable & stackable when used with standard feature set.

## **You Still Need Some Telco Lines:**

VoSKY and Skype still recommend you have a few lines for back up faxes etc. Skype lines do not yet have caller ID, No 911 tracking, Non Compatible with faxes. But great for every day calling!!!! A dedicated PC/SERVER is required for the VoSKY exchange products.

## **Product Descriptions:**

There are Exchange units that connect Skype Lines to your CO ports/lines (9040/9080) for single locations, extension ports (9140/9180) that focus on networking multiple locations, SIP trunk Ports (VISIP-EX) and to your T1/E1 (VIT1/E1) on your PBX/phone system. You can have Exchange units that have a server built in the Exchange or you can utilize your own server that meets the requirements (9040/9080 and 9140/9180) but each VoSKY Exchange unit does require a dedicated server - the VIS8, VIO8, VISIP-EX & the VIT1/E1 have built in servers.

**The 9040/9080** Exchange connects up to 4 or 8 CO/line ports to your PBX and are treated like any normal Telco line.

**The 9140/9180** Exchange connects up to 4 or 8 station/extension ports and has a built in Auto Attendant that can be utilized or turned off and also utilizes your PBX's features. The 9140/9180 are primarily used when either there are no available CO/Line ports or in networking multiple locations and can have up to 16 user/extensions in a call group.

**The VIS8** is the 9080 model with a built in server and is a stand alone, rack-mountable FXS PBX gateway that does not require a PC. This plug & play appliance seamlessly integrates with any existing TDM or IP PBX through the analog trunk ports to add up to 8 lines to Skype.

**The VIO8** is the 9180 model with a built in server and is a stand alone, rack-mountable FXO PBX gateway that does not require a PC. This plug & play appliance seamlessly integrates with any existing TDM or IP PBX through the analog station ports to add up to 8 lines to Skype.

**The VIT1/E1** comes with a built in server and is a stand-alone, rack-mountable appliance that does not require a tethered computer/server to configure or operate. The VoSKY Exchange Pro VIT1/E1 seamlessly integrates with any existing T1/E1 PBX to add up to 23/30 lines of Skype to your PBX/Phone System.

**The VISIP-EX** comes with a built in server and is a stand alone, rack-mountable SIP-to-Skype gateway that does not require a PC. This plug & play appliance seamlessly integrates with any existing IP PBX through SIP trunk ports to add up to 30 Skype lines to your PBX/Phone System. The base package comes with 18 SIP Trunk Licenses - VISIP 4 pack Trunk Licenses can be purchased for \$1,500.00 each to expand.

**The VoSKY Server VS50** is a cost-effective, enterprise-grade server for the VoSKY Exchange PBX-to-Skype gateway. Designed specifically for VoSKY Exchange, the VS50 ensures optimal performance and reliability for mission critical Skype for business applications. The VoSKY Server VS50 has been fully certified to work with the VoSKY Exchange models 9000, 9040, 9140. Utilizing the latest Intel dual-core processor technology, and energy-efficient DDR2 memory, the system is capable of running with lower power consumption without sacrificing power.

**The VoSKY Server VS100** is a cost-effective, enterprise-grade server for the VoSKY Exchange PBX-to-Skype gateway. Designed specifically for VoSKY Exchange, the VS100 ensures optimal performance and reliability for mission critical Skype for business applications. The VoSKY Server VS100 has been fully certified to work with all the VoSKY Exchange models - 9000, 9040, 9080, 9140 & 9180. Utilizing the latest Intel dual-core processor technology, and energy-efficient DDR2 memory, the system is capable of running with lower power consumption without sacrificing power.

\*You can utilize your own dedicated PC/Servers as long as all of the system requirements are met.
